STANDBY POWER SOLUTIONS

REACH Compliance Declaration

The Registration, Evaluation, Authorisation and Restriction of Chemicals Regulation (REACH) is European Union Regulation EC 1907/2006 and came into effect on 1st June 2007. The purpose of the Regulation is to protect human health and the environment by restricting and controlling the use of Substances of Very High Concern (SVHC). The list of SVHCs (known as the "Candidate List" is regularly updated by the European Chemicals Agency (ECHA) and is available by clicking the following link to their website <http://echa.europa.eu/web/guest/candidate-list-table>

We confirm that we understand the obligations imposed by the REACH Regulation. These may be considered under three headings: Import; Supply of Substances; and Substances in Articles.

1) Import

We do not import any raw materials directly from outside the European Union and therefore registration under the Regulation is not required.

2) Supply of Substances

We do not manufacture any hazardous substances or preparations and are not therefore required to produce any Safety Data Sheets (SDS).

3) "Substances in Articles"

We recognise our responsibilities under REACH in respect of SVHCs in our products or components therein.

We do not use any SVHCs in our manufacturing processes. We do however, purchase components that are manufactured outside of our own facilities. The manufacturers of those components are under a legal obligation to declare the presence of any SVHCs present at a concentration above 0.1% (weight/weight) in any products that they supply to us. We confirm that; (a) we have not received any such declarations, and (b) should we receive any such declarations in the future we will pass the relevant information on to our customers.

Our products make extensive use of batteries, which do contain SVHCs, such as Nickel-Cadmium batteries. These fall under the ECHA definition of "borderline articles" and we therefore provide customers with information concerning the safe use and handling of batteries as required by the REACH Regulation.

Please contact us if you require any further information.
