PB Design have been supplying charger systems and battery tripping units for over 40 years and have a proven track record for longevity.

eCoHARGE is our most cost effective battery tripping unit (BTU). Based on proven technology, **eCoHARGE** provides long life for the most demanding of applications.

eCoHARGE is available with a 4 or 10Ah VRLA battery in a range of voltages: 24, 30, 48 and 110V DC.

A single distribution way is available for connecting to the load. A simple user interface is provided allowing the user to select between

volts and amps on the digital multimeter display.

The life of the product and hence its impact on the environment can be further extended by

replacing the batteries when they are due. The

eCoHARGE is fitted with Sealed Lead Acid (VRLA) batteries with a 5-year life, requiring the minimum of maintenance.

Available ex-stock, **eCoHARGE** is supported by a 5-year warranty on the electronics.

Typical Installations:

- ◆ Factories
- ◆ Shopping Centres
- ◆ Apartment Complexes
- ◆ Hotels
- ◆ Sports Facilities
- ◆ Office Blocks
- ◆ Health Care Buildings
